## Road Trip Spare Parts List

Triumphs are generally mechanically simple (Stag and TR-8 excluded) and many breakdowns can be repaired on the road if you have spare parts and some basic tools. Here's a suggested list of spare parts. Make sure to customize for the needs of your car:

**Distributor Cap**  
**Rotor**  
**Contact Breaker (Points)**  
**Condenser**  
**High Tension Lead**  
**Sparking Plugs**  
**Valve Cover Gasket**  
**Cylinder Head Gasket**  
**Manifold Gasket**

**Radiator Hoses**  
**Fanbelt/Water Pump**  
**Fuel Filter/Fuel Pump**  
**Flasher Unit**  
**Fuses**  
**Spare Bulbs**  
**Oil/Water/Brake/Gear Fluid**  
**Shop Manual**  
**Parts Vendor Catalog**

Remember to bring some basic tools also. A good starting point is:

**Regular Screwdriver**  
**Phillips Screwdriver**  
**Pliers/Regular & Needle Nosed**  
**Combination Wrenches**  
**Vise Grips**  
**Pocket Knife**  
**Duct Tape**  
**Electrical Tape**  
**Socket Set (3/8" deep well and 1/4")**  
**Magnet**  
**Metal File**

**Pry/Cheater Bar**  
**Paper Towels or Shop Rags**  
**WD-40**  
**Air Pressure Gauge**  
**Gap Feeler Gauge**  
**JB Weld**  
**Tire Tools**  
**Flashlight & Batteries**  
**Water/Coolant/Jug**  
**First Aid Kit**

Possibly the most important item for your tool kit is...a (charged up) cell phone. Make sure you have a list of emergency numbers including AAA, your mechanic, parts vendors and other club members.

TTR Member Notes:

Jer has been working on/with Triumphs since before he could drive one. He learned to drive in a TR4 and the value of roadside repairs. He has seen a few failed repairs, and a few repaired failures. His present TR3A is a repaired flood victim. It was brought back from almost certain death to a point where it has won a second place competition trophy from a field of one. Since the complete frame off, ground up, self initiated restoration, the car has been driven completely across the country more than once, and on occasion, without a breakdown.

From John Baguley: Repainted my TR7 back to original color with spectacular results. Totally committed to performing a great job, detail oriented. Their main business is insurance collision repair, they do restoration work as a money-making hobby but it does not provide the returns of the insurance work so they only take on limited jobs to fit in. Did not have any rust to deal with so unsure of their capabilities here.

Ask Mike Hado about his experience with them. From James Moore: I've had oil pans, headers, intake manifolds and valve covers ceramic coated. They do nice work, although I was disappointed when they quit doing shiny ceramic coating for headers. They said that the shine dulled quickly, and they were getting quite a bit of customer complaints on that finish. You will have to go to Jethot for shiny.

### **Reliable Glass - Kenny Walls**

Onsite glass installation

Kenny Walls

512-629-1453

TTR Member Notes:

James Moore: Kenny comes to your house or garage. He has done a few Triumphs for me. He helped me get the glass out of a Backlight (Surrey top) that I wanted to get painted & helped me install a new glass in that. Very tricky, but Kenny did a very nice job. Very flexible with his hours. He's come out to my garage on Sunday afternoon when I was trying to get a windshield installed to meet a deadline. He also replaced the windshield on my Toyota FJ Cruiser. Nice job and he even apologized for taking longer as he didn't want to break any of the plastic pieces other installers usually break. I told him that I'd never had anyone do such a nice job on the truck before, so an apology was certainly not needed for being an anal retentive glass guy.
